10. Full Admin Menu Explanation - What Each Item Does (menu)

Bazino Admin Comprehensive Guide - WordPress Style

Section: /admin/intro - WordPress Style #1d2327 sidebar 160px, top bar 32px, content #f0f0f1

Description (EN):

This guide is for non-technical game-net owners. Bazino admin is designed exactly like WordPress admin: 160px dark sidebar #1d2327, 32px top bar, main content #f0f0f1 with white cards border #c3c4c7.

WordPress structure: fixed left menu, 34px item height, 20px icon, 14px text, color #eee, hover #72aee6 bg #2c3338, active #3858e9 with 4px left border #72aee6. Submenu bg #2c3338.

In Bazino, same structure: menu groups (Dashboard, Management, Sales, Content, Intelligence, Advanced) collapsible, menu search, count badges.

Default keys: all keys stored in service (ENV) appear as default registered in Keys Center. Admin only changes them.

Guide per section: click ? icon or Guide button to open this guide fullscreen with search, prev/next, close.

Description (FA): Full Persian guide available in web UI modal - /admin/intro

Step-by-Step:

1. Enter /admin - see 160px dark sidebar and 32px top bar
2. See left menu - each group has one job
3. Click any section - main content loads as WP-style white cards

Image Highlight Note:

In the web guide, each screenshot has highlighted overlay boxes showing referenced UI parts. E.g., API key input is highlighted with yellow border and label "Paste key here".

Dashboard & Live Stats (/admin/dashboard)

Section: /admin/dashboard - WordPress Style #1d2327 sidebar 160px, top bar 32px, content #f0f0f1

Description (EN):

Purpose: know today earnings, busy/broken systems, crowded or not.

Top cards: 4 cards - today revenue, active reservations, online users, open tickets.

Peak chart: bar - busiest hour.

Lists: systems online/offline and recent cafe orders.

Description (FA): Full Persian guide available in web UI modal - /admin/dashboard

Step-by-Step:

1. Check today revenue card - if zero, go to Customization > Data Source and choose Database
2. See peak usage chart - use busiest hour for dynamic pricing
3. Review systems list - turn OFF broken system

Image Highlight Note:

In the web guide, each screenshot has highlighted overlay boxes showing referenced UI parts.
E.g., API key input is highlighted with yellow border and label "Paste key here".

Clients & Systems (/admin/systems)

Section: /admin/systems - WordPress Style #1d2327 sidebar 160px, top bar 32px, content #f0f0f1

Description (EN):

Purpose: add new system, change hourly price, disable broken.

Add: top form - name, type, hourly rate, audience.

Edit: table toggle or price edit - instant.

Delete: past reservations stay.

Description (FA): Full Persian guide available in web UI modal - /admin/systems

Step-by-Step:

1. Fill add form: name, type, price - click Add
2. In list toggle ON/OFF - OFF broken ones
3. Edit price - auto save

Image Highlight Note:

In the web guide, each screenshot has highlighted overlay boxes showing referenced UI parts.
E.g., API key input is highlighted with yellow border and label "Paste key here".

Cafe Buffet (/admin/cafe)

Section: /admin/cafe - WordPress Style #1d2327 sidebar 160px, top bar 32px, content #f0f0f1

Description (EN):

Purpose: set cafe menu, manage stock, fulfill orders.

Add item: name, category, price, image, stock.

Orders: Pending -> Preparing/Delivered to bill.

Mistakes: no image, zero stock but available checked.

Description (FA): Full Persian guide available in web UI modal - /admin/cafe

Step-by-Step:

1. Enter name, category, price, image, stock - save
2. See new orders in orders tab - change status

Image Highlight Note:

In the web guide, each screenshot has highlighted overlay boxes showing referenced UI parts.
E.g., API key input is highlighted with yellow border and label "Paste key here".

Accessory Shop (/admin/shop)

Section: /admin/shop - WordPress Style #1d2327 sidebar 160px, top bar 32px, content #f0f0f1

Description (EN):

Purpose: add mouse, headset, keyboard - customer buys with points.

Add product: name, desc, price, image, category, stock.

Orders: approve/reject like cafe.

Description (FA): Full Persian guide available in web UI modal - /admin/shop

Step-by-Step:

1. Add product - accurate price and stock
2. Approve orders

Image Highlight Note:

In the web guide, each screenshot has highlighted overlay boxes showing referenced UI parts.
E.g., API key input is highlighted with yellow border and label "Paste key here".

Tournaments (/admin/tournaments)

Section: /admin/tournaments - WordPress Style #1d2327 sidebar 160px, top bar 32px, content #f0f0f1

Description (EN):

Purpose: create tournament - prize, game, date, teams.

Create: title, game, entry fee, start date, max teams.

See teams: registered count in list. For bracket go to ops tab.

Description (FA): Full Persian guide available in web UI modal - /admin/tournaments

Step-by-Step:

1. Title, game, fee, date, max teams - Add
2. See team registrations

Image Highlight Note:

In the web guide, each screenshot has highlighted overlay boxes showing referenced UI parts.
E.g., API key input is highlighted with yellow border and label "Paste key here".

Content Studio (/admin/content) - v2 Redesigned

Section: /admin/content - WordPress Style #1d2327 sidebar 160px, top bar 32px, content #f0f0f1

Description (EN):

Previously 13 messy tabs, now 4 big cards: Quick Guide, MediaGen, Trends, Publish Queue.

4-step publishing: Prep -> Preview & Approve -> Publish & Record Media -> Invite & Assign.

MediaGen: quota top, form title, model (Flux best for neon), detailed prompt, confirm cost and generate. Task below, when completed Import to draft.

Trends: YouTube Gaming and Twitch columns for ideas. If empty, need API keys in Keys Center.

Queue: list posts - title, caption, status, language, media count. Click to edit: reorder images drag&drop, caption, preview, approve, publish/schedule.

Description (FA): Full Persian guide available in web UI modal - /admin/content

Step-by-Step:

1. Enter /admin/content - see 4 big cards
2. MediaGen: Flux model, detailed prompt, confirm cost, generate
3. Trends: see YouTube & Twitch for ideas - if empty add API keys
4. Queue: edit post, reorder images, caption, preview, approve, publish

Image Highlight Note:

In the web guide, each screenshot has highlighted overlay boxes showing referenced UI parts. E.g., API key input is highlighted with yellow border and label "Paste key here".

Keys Center - All APIs in One Place (/admin/apiKeys) - Most Important

Section: /admin/apiKeys - WordPress Style #1d2327 sidebar 160px, top bar 32px, content #f0f0f1

Description (EN):

Previously keys scattered in 3 places. Now all here: Jarvis, desktop sync, content gen, social, affiliate tokens.

Jarvis: up to 3 models - Groq fast & cheap first choice, OpenRouter free second, Gemini powerful third, Ollama local. Each: display name, model, API key, enabled, baseUrl for Ollama.

Default keys from ENV: if set in service (Railway/ENV), shown masked as "-----" with label "ENV default". Admin only changes.

Desktop Secure Link (Web Sync): secure key for desktop app to web. Min 16 chars. Generate or save manual. Enter in desktop app Web Sync. Address: <https://bazino.pro>

Content: GROQ_API_KEY, IMEJIS_API_KEY, CLOUDFLARE_API_TOKEN, ELEVENLABS_API_KEY, ZERNIO_API_KEY.

Social & Trends: YOUTUBE_API_KEY, TWITCH_CLIENT_ID, TWITCH_CLIENT_SECRET needed for Trends tab.

Affiliate tokens (baz_...): for Manus/Zernio - created in Affiliates but shown here to centralize.

Publishing: mediagenEnabled, designs allowlist - settings live in /admin/content -> Settings.

Description (FA): Full Persian guide available in web UI modal - /admin/apiKeys

Step-by-Step:

1. Top choose category: Jarvis, Desktop, Content, Social, Affiliate - all keys in one place
2. Jarvis: see 3 boxes - #1 Groq (has ENV default), #2 OpenRouter, #3 Gemini - each key, model, enabled - default masked, enter new to override and save
3. Desktop: generate or enter Web Sync key - min 16 chars - enter in desktop app
4. Content: enter Groq, Imejis, Cloudflare, ElevenLabs, Zernio - if set in ENV, shown as default registered
5. Social: enter YouTube and Twitch for Trends - without it trends empty

Image Highlight Note:

In the web guide, each screenshot has highlighted overlay boxes showing referenced UI parts. E.g., API key input is highlighted with yellow border and label "Paste key here".

Jarvis - Admin AI Assistant (/admin/jarvis)

Section: /admin/jarvis - WordPress Style #1d2327 sidebar 160px, top bar 32px, content #f0f0f1

Description (EN):

Purpose: fast management with natural language - command, it does.

Write command: e.g. "disable system 4" or "how much sold today?" or "create Valorant tournament".

See result: Jarvis answers and does task if needed.

Jarvis keys: must have at least one key in Keys Center -> Jarvis. If set in ENV, has default.

Models: up to 3 models with priority - first active, second/third fallback.

Description (FA): Full Persian guide available in web UI modal - /admin/jarvis

Step-by-Step:

1. Go to /admin/apiKeys -> Jarvis - check at least one key registered (ENV default)
2. Go to /admin/jarvis - write Persian command: e.g. "set system 2 to 30000"
3. See result - if error, check key

Image Highlight Note:

In the web guide, each screenshot has highlighted overlay boxes showing referenced UI parts. E.g., API key input is highlighted with yellow border and label "Paste key here".

Full Admin Menu Explanation - What Each Item Does

Section: /admin/menu - WordPress Style #1d2327 sidebar 160px, top bar 32px, content #f0f0f1

Description (EN):

Dashboard group: Dashboard & Live Stats - heart, revenue, systems, orders, tickets.

Management group: Clients & Systems - PC/PS5/Xbox/Simulator, hourly rate, active/inactive. Cafe Buffet - menu and orders. Accessory Shop - products and stock. Tournaments - create tournament. Tournament Operations - bracket, check-in, result.

Messaging & Content group: Bulk Messaging - SMS/Viber/WhatsApp via Messaggio, campaigns. Blog & News - articles. Content & Publish Queue - 4 big cards: AI image gen, daily trends YouTube/Twitch, publish queue Insta/Telegram.

Sales & Finance group: Coupons & Free/Half Hours - discount code, special hours. Wallet & On-site Payments - manual top-up, history. Affiliate Marketing - referral, commission, invite link ?ref=CODE.

Communication group: Live Chat Rooms - gamers chat. Messages & Notifications - send to single/bulk users. Support Tickets - reply and close.

Intelligence & Technical group: Jarvis AI Assistant - natural language commands. Keys Center - all APIs in one place: Jarvis 3 models with ENV default keys, Web Sync, Content, Social, Affiliate.

Advanced group: Themes - install ZIP (theme.json+theme.css+assets), site-wide activate, export. Home & App Slider - big banner. Mobile App Download - APK link. Site Customization & Club Info - address, phone, social, data source Sample/Database. Database Logs - debug. Database Migrations - C# code for EF Core. Presentation - Bazino intro.

Description (FA): Full Persian guide available in web UI modal - /admin/menu

Step-by-Step:

1. See 160px sidebar - 7 main groups: Dashboard, Management, Messaging & Content, Sales & Finance, Communication, Intelligence & Technical, Advanced
2. Open each group - see count - click any section to load WP-style white cards
3. For keys always go to Intelligence -> Keys Center - all in one place

Image Highlight Note:

In the web guide, each screenshot has highlighted overlay boxes showing referenced UI parts. E.g., API key input is highlighted with yellow border and label "Paste key here".

WordPress Admin Research & Design Applied

WordPress admin top bar #wpadminbar: height 32px, bg #1d2327, color #eee, sticky top 0, z-index 9999.

Sidebar #adminmenumain: width 160px, bg #1d2327, min-height calc(100vh - 32px).

Menu top level .wp-menu-top: height 34px, padding 0 12px, font 14px, color #eee, icon 20px #a7aaad.

Hover: bg #2c3338, color #72aee6, icon #72aee6.

Active: bg #3858e9 (or #2271b1), color white, left border 4px solid #72aee6, icon white.

Submenu .wp-submenu: bg #2c3338, padding 7px 0, items height 34px, font 13px, color #c3c4c7, hover #72aee6 bg #1d2327.

Main content #wpcontent: flex 1, bg #f0f0f1, min-height calc(100vh - 32px).

Wrap .wrap: max-width 1280px, cards .postbox bg white border #c3c4c7 shadow 0 1px 1px rgba(0,0,0,0.04).

Page title .wp-heading-inline: font 23px normal, color #1d2327.

Buttons: primary bg #2271b1 border #2271b1 color white hover #135e96, secondary bg white border #8c8f94.

Inputs: height 30px, bg white border #8c8f94 focus #2271b1 shadow 0 0 0 1px #2271b1.

Guide modal: fixed top 32px (accounting for admin bar), left 0 right 0 bottom 0, height calc(100vh - 32px), centered flex, z 100.

Image annotations: absolute overlay boxes with border 2px solid #f0c040 or #2271b1, label badge.

PDF viewer: fullscreen modal with iframe, prev/next buttons, search box filtering steps, close icon X top-right.

Keys Center: default ENV keys shown masked, admin only edits - implemented via getJarvisAiProviders(true) returning envProviders.
